DOG LICENSE RENEWALS – SEE FORM ON BACK

FLUSHABLE WIPES... OR NOT (REMINDER)

Wipes are not designed to break down in sewer systems or treatment plants and can gum up the system. Several studies over the past several years have provided evidence to suggest that wipes branded as “flushable” are clogging wastewater systems. It is estimated that disposable wipes make up 90% of these massive clogs. Goodhue is also experiencing continued issues with them.

Unlike toilet paper, which breaks down quickly in water, wet wipes remain intact and tangle into massive clogs that jam pumps and blocks sewers. Even those labeled "flushable" should not be flushed.

If you must use wipes, put them in the trash, not the toilet. These same wipes may also be the culprit if you’re having plumbing problems.
